### **FOCUSED ON BEEF**

At DAYBREAKER BEEFMASTER we continue to strive for excellence in our purebred Beefmaster cattle. In the spring of 1989 we began using Lasater Beefmaster genetics. We were very impressed with the Beefmasters ability to convert grass to beefy muscle with the absolute minimum interference. Lasater, starting in 1932, bred cattle for the 6 essentials – disposition, fertility, weight, confirmation, hardiness and milk production.

This is continued in the DAYBREAKER BEEFMASTER herd. All these essentials the cattle need to achieve in a commercial environment without being pampered. The cattle must work for us and not us for them. We always keep some selection pressure on our cattle by running them at a high stocking rate (4-5 ha/cow in a low rainfall area). Since 1989 we have stayed with a very strict breeding season of 60 days for heifers and 75 days for cows. Those that do not conceive we reject and they are not used in the improvement program. Beefmasters have performed well for us in the Eastern Cape Grassveld and Bushveld. For the last 15 yrs we have added performance on grass to our selection program. We want our cows to hold their condition during dry years and still wean a good calf. The only way of achieving this is to select for it by putting some pressure on the herds (Stocking Rate). Nature also plays a part during dry years.

We have experienced many times under these competitive conditions that weaning weight per calf is under pressure but overall weaning weight per hectare (total weight of calves weaned on a given area) increases. This is far more important to us for financial performance.

Rotational grazing is very important as a large proportion of our grassveld is allowed to rest and grow after rains. The effect on grass growth and production is even greater with lower rainfall. We have measured up to 1200 kg/ha grass production in well rested veld and the equivalent liveweight gains of 40 kg/ha. With veld in poor condition the yield drops to 350 kg/ha and beef production is negligible. To be able to free up camps we bunch and run as few relatively big herds as possible. Heifers are AI'd and put in with the cows of all ages and have to remain productive under these competitive conditions. First calvers get no preferential treatment. We monitor with interest the progress year after year of our best older cows in this system. We look closely at COW EFFICIENCY. Somehow their bull calves are not overmuscled, heavily boned, coarse and very masculine. We consider MATERNAL genetics to be very important.

Our selection and program ensures that each generation is better than the one before. So we use our bulls once at two years of age and then offer them on our sale the next year. You can buy the absolutely best bulls we produce.

Lately bulls have been sold at our annual BULLS "ON" GRASS sale throughout the Eastern Cape, Free State and Kwazulu-Natal with very favourable feedback from our customers. Venue FORDYCE 20km outside Queenstown on Tarkastad road. Date 7 - 10 August 2017.

**FUNCTIONAL CATTLE are ESSENTIAL in LIFE !!!**

## **PLEASE NOTE THE FOLLOWING:**

1. The LASATER PHILOSOPHY has been applied and LASATER genetics used since 1989.
2. The breeding program has been to AI 50 of the best heifers every year with imported Lasater genetics and lately some of the best RSA bulls. Only top class sires have been used in multisire herds.
3. Emphasis is on functional females with fertility consistently above 90%. No skips have been used in the breeding program.
4. We concentrate on production from veld (hardiness) with minimum interference and expensive inputs.
5. The grass efficiency index has been inverted so it can be interpreted the same as other indices. Higher than 100 is more efficient than average.
6. The bulls offered have been tested and their fertility is certified (Dr Elriza Kloppe). They are also free of venereal diseases, CA and TB.
7. Inoculations carried out are Anthrax, Black Quarter and Lumpy Skin.
8. All Bulls have been blooded for both Redwaters (African + Asiatic) and Gallsickness this year.
9. All bulls including keepers have had their DNA analysed for sire verification.
10. Please insure bulls for transport.
11. Please leave written loading instructions.
12. Studbook certificates are available for the registered bulls.
13. Frame score is measured at the (hip) pin bones.
14. A frame score of 2 is equal to 50 inches, 3 = 52 inches, 4 = 54 inches, 5 = 56 inches and so on.
15. A 3 yr old bull is measured as he stands (mature size).
16. For a 2 yr old bull we measure him and add one frame score so as to predict his mature size.
17. You can buy the best bulls we produce.

## **AUCTIONS UNDER THE AUSPICES OF THE BEEFMASTER CATTLE BREEDERS' SOCIETY**

It is compulsory for all stud auctions to be conducted under the auspices of the Society.

The term **"Under the auspices of the Beefmaster Cattle Breeders' Society"** means that officers of the society shall ensure that the official catalogues, drawn up by SA Stud Book with the information on its "Logix system", are available at the auction, that the information regarding paternity, production data and estimated breeding values, contained in the catalogue complies with the minimum breed standards as set by the Beefmaster Cattle Breeders' Society as well as the applicable provisions of the Constitution of the Beefmaster Cattle Breeders' Society, and that the animals offered have already been inspected and approved by an inspector.

The Beefmaster Cattle Breeders' Society also requires that stud animals offered at stud auctions under the auspices of the Beefmaster Cattle Breeders' Society are inspected on the day of the auction by inspectors of the Society to ensure that the animals still comply to the Beefmaster's minimum breed standards.

The Society also verifies the following requirements for animals to be offered at an auction under the auspice of the Society:

- Fertility certificate (not older than three months) and certificate regarding venereal diseases of bulls
- Certificate (not older than three months) of a negative Tuberculosis test of cows, heifers and bulls
- Certificate (not older than three months) of a negative Contagious Abortion test of cows and bulls
- Heifers older than 32 months and cows without a calf should preferably be pregnant and certified as such
- All semen and embryo donors offered for sale must be registered as donors

Although the Society carries out all checks to the best of its ability, the Society do however, not have any control over tests carried out and/or information provided by a third party and/or guarantee its accuracy or accept responsibility for erroneous information. The Society can thus not vouch for the following:

- Immunisation and health status of the animals
- Pregnancy status of cows and heifers
- Breeding ability of bulls
- Fertility status
- Venereal disease
- Faulty information due to printing errors.

The "Logix system" the computer animal recording system used by SA Stud Book to administer the Society's animal recording services, is also deemed as a third party. The information obtained from Logix is therefore deemed as information from a third party.

Commercial animals and animals not approved for sale at an auction, cannot be offered for sale under the auspices of the Society.

## HOW TO USE SELECTION VALUES

Logix Breeding Value Indices and Selection Values are versatile and can be used effectively to select various types of animals suitable for different environments and markets. Three examples of selection goals are shown. Always check all selection values for compatibility with your specific selection goal and never select only on the Cow Value.

### AVERAGE ANIMALS

(NO GROWTH EXTREMES)

| COW VALUE 112        |                    |
|----------------------|--------------------|
| 99                   | Calving Ease Value |
| 109                  | Calf Growth Value  |
| 108                  | Milk Value         |
| 95                   | Maintenance Value  |
| 104                  | Fertility Value    |
| GROWTH VALUE 108     |                    |
| CARCASS VALUE 109    |                    |
| PRODUCTION VALUE 109 |                    |

- Selection Values 90 to 110
  - Cow Value & Fertility Value average to high
- A safe choice, as animals are profitable in most environments.

### GROWERS
