Reg No. FC10/10311

#### Maritz Bovelder Veterinary Report

- The Bovelder Bulls on offer represent the top genetics from an exceptional herd with which we are proud to be associated. The Maritz Bovelder herd runs extensively on sourveld and is outstanding in terms of fertility, productivity, and temperament. The pregnancy rate this year was greater than 98%.
- A written herd health and biosecurity plan is adhered to, via the Bovelder Bees Studiegroep. There is a comprehensive vaccination program including Galsiekte (anaplasma), respiratory diseases (BVD, IBR, Pasteurella etc), Clostridial diseases and Lumpy Skin Disease. The Asiatic Redwater vaccine was not available at an appropriate time this year.
- All Bulls are rigorously assessed for any defects in conformation, temperament etc.
- A Breeding Soundness Evaluation was performed including assessment of internal and external genitalia, semen motility and sperm morphology. All are satisfactory.
- Bulls tested negative for Trich (*Tritrichomonas foetus*) via PCR and culture. All tested negative for Vibriosis (*Campylobacter Fetus*) via PCR and are vaccinated with Vibrin.
- I have been working with this herd since 2010 and know of no herd health problems of concern. I can recommend the Bulls on offer to any well-run commercial herd.

Dr Neil Nixon BVSc MSc (Veterinary Epidemiology)
