THE BRAHMAN CATTLE BREEDERS' SOCIETY OF SOUTH AFRICA
DIE BRAHMAN BEESTELERSGENOOTSKAP VAN SUID AFRIKA

EXPLANATORY NOTES FOR CATALOGUES

BREEDPLAN uses the world's most advanced genetic evaluation system (based on Best Linear Unbiased Prediction (BLUP) technology) to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

An animal's breeding values can be defined as its genetic merit for each trait. These estimates of an animal's breeding values are called EBVs (Estimated Breeding Values).

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200 Day Growth or Wean Weight EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400 Day Weight or Yearling Weight EBV (kg) is calculated from the weight of animals taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight or Final Weight EBV (kg) is calculated from the weight of animals taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

200-Day Milk EBV (kg) is an estimate of the maternal contribution of the dam to the 200-day weight of her calf. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 and 400-day weights of their calves.

Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age.

Carcass Weight EBV (kg) estimates the genetic difference in carcass weight at a standard age of 650 days.

Days to Calving EBVs are estimates of genetic differences between animals in time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. DC EBVs are expressed in days and are calculated from the joining records submitted for females. Negative DC EBVs are more favourable.

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

Docility EBVs are estimates of genetic differences between animals in temperament. Doc EBVs are expressed as differences in the percentage of progeny that will be scored with acceptable temperament (i.e. either "docile" or "restless").

Brahman Rangeland Grazing Index (R RG) estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting steers for export markets. Steers are assumed to be pasture grown & finished at around 500 kg live weight or 250 kg carcass weight at 30 months. The index is also suited to using Brahman sires over mixed breed cows.

Brahman Wean Index (R WW) estimates genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd producing weaners for sale at about 7 months of age off pasture. The index has emphasis on calving ease and maternal traits while acknowledging that these animals will be grown on to be finished and slaughtered at an older age. This index is suited to select sires and dams where more emphasis on cow traits is required

Brahman Feedlot Index (R F) estimates genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd targeting steers to turn off at 12 months of age. There is some emphasis on calving ease and maternal traits while finishing steers at around 400 kg live weight (230 kg carcass weight) after 120 days on feed. This index is also suitable to using Brahman sires over mixed breed cows.

THE BRAHMAN CATTLE BREEDERS' SOCIETY OF SOUTH AFRICA
DIE BRAHMAN BEESTELERSGENOOTSKAP VAN SUID AFRIKA

Last Reviewed: February 2023

MINIMUM FERTILITY REQUIREMENTS for FEMALES on SALE

As a result of the importance of reproduction standards and the Society's constitutional requirements as set out in the Bye-Law 13.4:

The current reproduction requirements are:

- (i) AFC 43 months or less
- (ii) The number of calvings in comparison to age as follows:

AGE (months)	Number Calvings
43	1
70	2
90	3
108	4
127	5
144	6
161	7
177	8
192	9
208	10

Note that only active, registered, appendix B and SP females, that were born after the 1/1/03, who are not 'held' in error, will be calculated. Females in Embryo programs will be excluded from these calculations.

Also note that the registration of a female animal, cancelled due to fertility, is noted on the System. Such an animal is not suitable for further breeding and will therefore not be re-instated.

Minimum AFC over Years:

YEAR	Minimum AFC (months)	Females implicated
2013 – 2015	46	Heifers and Cows
2016	46	Heifers
2017	45	Heifers
2018	44	Heifers and Cows
2019 to current	43	Heifers and Cows

Example: A heifer calving in 2017 needed to have her calf by 45 months. Even though it is higher than the current 43 months, she passed the requirement in 2017, and is acceptable to sell now.

Jong vroulike koei met goed gevormde uier en spene. 'n Charlie DBI512 (Bos Lox Manso 216 lyn) dogter. Baie vrugbaar, 2 kalwers, IKP 374. Sy is weer 5 maande dragtig van WRR186 Romeo (Royal Salute seun R100622). Moet haar nie mis, haar hele lewe lê voor haar. Kom uit strawwe hardwater area. Sy behoort nageslag te teel wat winsgewend in al drie markstelsels is.

Ons bied met trots die uitsonderlike koei aan! Oor 8 skoue waaraan sy deelgeneem het was sy 3 x Reserwe Kampioen, 5 x Kampioen, 4 x Reserwe RAS Kampioen, 2 x RAS Kampioen, asook Goue Beker wenner Ellisras 2022. Sy teel soos sy lyk, 'n kombinasie van vroulikheid, breedte, en lengte. Daar is nie elke dag 'n dier van haar kaliber beskikbaar nie. Sy is 4 maande dragtig van WIL18333.

Sir Azurro has redefined excellence at Meadowood Brahman. He is one of the best bulls to ever grace our plains, and has become the cornerstone of our breeding program, representing the pinnacle of Meadowood Brahman genetics. A descendant of the legendary American champion bull Stingray, Sir Azurro hasn't just upheld his lineage - he's elevated it. His pedigree is impressive, but it's his exceptional qualities and progeny that truly set him apart, with the epitome of Brahman superiority. His legacy is already being carried forward by his progeny. The future of Brahman breeding is bright under the influence of this iconic sire.

Potential Herd sire. Arguably the best bull Maranlo Brahman has bred. He is as thick as they come, packed with muscle, bone, masculinity and lots of beef, yet he is still very correct and walks with great ease. Backed by a very good pedigree, BOS03100 and BOS99977, both National Show Champions. He also goes back to HBS82112, HBS88164, NJ821, BOS93108, BOS97613, BOS09160, HS882. Raised and prepared on natural pasture. Retain Semen Share.

Meadowood Brahman is thrilled to offer this exceptional Show Cow Miss Jhenifer. This extraordinary cow is a true genetic powerhouse, with lineage tracing back to the renowned MR CANADIAN EMPEROR 7W on the sire side and +Mr 3X ORO ROJO 800 on the dam side. Over and above the eye appeal being truly feminine in all aspects she has an exceptional ICP with three exceptional calves that she bred. She is already very successful in our embryo program. She is truly exceptional in all aspects. She is 5.5 months in calf.

Top jong vers wat 'n top koei in enige kudde sal wees! Sterk oor haar rug en middelstuk, sy het baie diepte en dra meer as genoeg vleis regdeur. Dogter van ons trots ELT1673, 'n bul wat 'n reuse impak in ons kudde gemaak het. Daar is min van sy dogters in die mark.

JDH684 Maddox bul wat 'n enorme impak in die internasionale Brahman wêreld gemaak het. Vaar van vele internasionale kapioene, manlik sowel as vroulik! Uit die beperkte semen wat SA ingekom het is daar 4 gesogde stoet bulle geproduseer! Waarvan een LOT 28 is! Hier is die geleentheid om een van die laaste van strooie van die fenominale bul te bekom !!!!

Dome Africa's renowned foundation Herd Sire bred by Kroon Vee and bought back by Kroon Vee in 2024. He did not only bred Show Winners in the Dome Africa Herd but also did he breed the right type for us on male & female side. Two of his Sons are currently used in the herd with JHP21155 LAVA as our current new herd sire. He is a top breeder!!
 2 x 10 Straws.
